

Presenting from a laptop

Firstly pull out the sliding shelf from the side of the lectern and place the laptop upon it. Plug in the video cable and, if you expect to use any applications with audio, the audio cable.

HP6730b (standard) laptops: video is at the left/rear and audio is front/centre.

HP2530p (lightweight, pictured) laptops: video and audio are on the right.

Press **PROJ** on the control panel and **COMP** so that the projector takes input from a computer. Press **ON** to activate the projector and **IMAGE** to display the laptop screen.
