Presenting from laptops in tutorial rooms

1. Plug in the video cable and, if you expect to use any applications with audio, the audio cable.
   a) HP6730b (standard) laptops: video is at the left/rear and audio is front/centre.
   b) HP2530p (lightweight, pictured) laptops: video and audio are on the right. Make sure you plug the cable into the headphones socket.

2. Press ON and then WALL BOX on the control panel so that the projector takes input from the laptop.
