How to set up BIZ VPN

You can access the Business School's online resources, such as websites and email, from home via Virtual Private Networking (VPN).

Business School, Law School and SIS staff have a VPN service available via BITS.

Students need to use the Uniconnect VPN service, as do staff who wish to access UWA services outside the Business School network. Students and staff register using their Pheme accounts.

Configure a VPN to the Business School network

1. Find Network and Sharing Centre
2. Open network wizard
3. Connect to a workplace
4. Select VPN
5. Enter VPN details
6. Type your username and password
7. Connect to the VPN
8. Disconnect from the VPN

Step one
Find Network and Sharing Centre

To configure VPN to connect to the Business School, click Start -> Control Panel -> Network and Sharing Centre.

Step two
Open network wizard

Click “Set up a new connection or network”.

Change your networking settings

Set up a new connection or network
Set up a wireless, broadband, dial-up, ad hoc, or VPN connection

Back to top
Step three
Connect to a workplace

Choose "Connect to a workplace"

Click Next, then select "No, create a new connection". Click Next to continue.
Step four
Select VPN

Select “Use my Internet connection (VPN)”.
Step five
Enter VPN details

In the Internet address box enter "staffvpn.biz.uwa.edu.au", and in the Destination name box enter "UWA Business School", then click Next to continue.
Step six
Type your username and password

Enter your staff number in the Username box, your Pheme password in the Password box, and “UNIWA” in the Domain box. You can also tick “Remember this Password” if you don’t want to enter your password each time you connect.
Once connected to VPN, you will be able to access internal Business School network resources. If you want to access the web, you will need to configure your VPN connection to use your “native” internet connection instead of the UWA one.

*Step seven*

**Connect to the VPN**

Click Connect and your computer should now connect you to the VPN.

For future connections to the VPN, just click on the Network and Sharing Centre icon in your system tray (lower right corner of your desktop, near the time). The icon looks like a computer screen.
Highlight the connection you just created, called "UWA Business School" and click Connect, then click Connect again on the next screen.
Step eight
Disconnect from the VPN

Click on the Network and Sharing Centre icon in your system tray (lower right corner of your desktop, near the time). The icon looks like a computer screen.

Highlight the UWA Business School connection (the one that says “Connected”) and a Disconnect button will appear.
Click Disconnect.
